7000 series	DFL7160 DFL7340 DFL7360 DFL7361
8000 series	DFE8060 DFG8340 DFG8360 DTG8440 DFP8760 DAS8920 DAS8930 DFS8910

Regulator

The part is installed inside the equipment and controls the air pressure used in the equipment.
The shape may differ depending on the equipment it is installed in.

Request about Handling the Regulator

Please do not forcibly rotate the knob of the air regulator to the right. Continuing to forcibly rotate the knob to the right may cause the fasteners inside to drop off, preventing adjustments to the air pressure. Please be careful not to forcibly rotate the knob when the primary air pressure is low.

Inquiries

For inquiries about this topic, please contact your local DISCO sales representative or customer engineer.
